

## SENIOR FULL-STACK DEVELOPER

# Vinícius Siqueira

vinisqueira00

+55 22 99274-3135

vinicius.siqueira642@gmail.com

I am a developer with over **7 years** of experience, with almost 4 and a half years more focused on **front-end web** development using **ReactJS**. Proficient in **UI Design** and **back-end**, I have gained experience at **major players**, using current technologies such as **Next.js**, **NestJS**, and **Tailwind**.

## PROFESSIONAL EXPERIENCE

### Full-stack Developer

Cadastra (M3 Ecommerce)

Aug, 2020 – Present (~4 years and 4 months)

- Developed UI/UX designs in **Figma** for both **internal** and **client** projects.
- Implemented **e-commerce** solutions using **VTEX**, focusing on **user experience**.
- Gained proficiency in various **VTEX functionalities**, including **orderform**, **session**, **masterdata**, **services**, **whitelabel**, and **marketplace**.
- Worked on **national** (Brazil) and **LATAM** (Argentina, Chile, Colombia) projects, collaborating with **Spanish-speaking** team members and improving **Spanish communication** skills.
- Participated in squads dedicated to **major national retail players** like **Carrefour Brasil** and **RiHappy**, integrating with the client's **internal team** using agile methodology (**Scrum**).
- Developed significant solutions, such as an **internal management system** for controlling distributed **delivery capacity** (VTEX/iFood) and an **integration** solution between **VTEX** and **GShop**.
- **Architected, implemented, and delivered** a notable project: a script to handle a **large** volume of **requests** (approximately **5 million requests**) daily at a specific time.

### Full-stack Developer

Friweb - Agência Digital

Jan, 2019 - Jun, 2020 (~1 year and 5 months)

- Worked as a full-stack developer on **legacy PHP projects**.
- **Gathered client requirements** for the implementation and evolution of **complex projects**.
- Achieved a level of **independence**, **commitment**, and **responsibility** to make **decisions** on projects I was directly and indirectly involved in.
- Developed **payment gateway** integration for an **e-commerce** platform, a mock exam platform for public tenders, and maintained an **e-commerce** platform built entirely in **PHP** and **HTML/CSS/JQuery**.
